

FingerTec

- 4 different verification methods; fingerprint, card, face and password.
- Affordable pricing, save cost with no need to buy periphery terminals or add-on's.
- High capacity up to 10,000 fingerprint templates.
- Compact, minimalistic design.
- Worldwide maintenance and parts replacement via local service centres.
- Round the clock technical support for no extra charge via various channels such as Skype and/or TeamViewer.
- Various software (TCMSV2, TimeTec, Ingress) to manage data (from basic to comprehensive) – bundled with hardware for free.
- Convenient and non intrusive.
- Ease of data transfer (USB).
- 2 years limited warranty.

Hand Punch

- Single type of verification.
- High cost per terminal (higher weight = higher freight charges).
- Lower capacity (less than 5,000 hand templates), expandable but at a very expensive cost.
- Large, cumbersome design .
- Maintenance- only Singapore and US.
- Limited and non-comprehensive technical support, expensive service charge.
- Intrusive, requires whole palm for verification, unhygienic.
- Basic software for management of data, upgrades are at extra costs.
- 1 year limited warranty.
