

Wi-Fi Hotspot Solution for Coffee Shops & Restaurants

Wi-Fi Hotspot Solution for Coffee Shops & Restaurants Powered by 4ipnet

"4ipnet HSG327 + WTG2 is the most Economical, Feature-Rich and the Simplest Wireless Hotspot Solution which can be Configured in no time."

- HSG327 is an access point with built-in controller functionality, ideal for Cafes and restaurants to quickly generate accounts for guests and patrons.
- Once a billing plan is configured in the HSG327, paid Wi-Fi Service (Based on traffic, volume or time) can be enabled.
- Limited free access can be granted to customers by simply requesting them to enter their details such as Name, E-mail ID & Mobile et cetera which helps in building customer database and can be used to send promotional mails.
- Owners can prevent “Wi-Fi squatters” from staying for hours without ordering or buying items on the menu which in turn minimizes lost revenue.
- When HSG327 is connected to a 4ipnet Wireless Ticket Generator, a Wi-Fi network with an advanced ticketing system is established.
- Wireless Ticket Generator Can create an on-demand account and print out the login credentials with matching QR Codes in just a couple of seconds.
- With credentials printed on tickets guests no longer need to remember any complicated password's.
- Mobile device guests can simply scan the QR Code and enjoy the Wi-Fi connectivity without all the trouble some login procedures.
- Link to see how QR Code works <https://www.youtube.com/watch?v=CKAVqlcR23Y>
