

VISITOR MANAGEMENT SYSTEM

Overview Features

- Visitor Management System integrated with Emirates ID electronically captures Visitors complete information like EID No, Full Name, Company Name, Nationality, Mobile No, Gender, Passport No, Address and also Photograph.
- Our Visitor Management System replaces traditional visitor log books in which visitors information are entered along with their IN and OUT time. The solution handles the entire process of Visitor Management including registering the visitors, issuing the badges, Creating appointments and logging their IN and OUT time digitally with ease.
- English and Arabic Language support. Responsive Design, Mobile, Tablet Compatible.
- Appointment Module to pre-register Visitors/Contractors.
- Integrated with Emirates ID and Passport. Check-in less than 20 seconds.
- □ Integrated with Facial Recognition with temperature Detection Integrated. Recognition time less than a second.
- □ Integrated with Bluetooth based app using hand gestures at Speed Gates.
- □ Integrated with Active Directory, SMS Gateway, Email integration and Web Camera.
- Administration and User roles Management.
- Alerts and Notifications through Email & SMS.
- Encrypted Visitors Data for security reasons.
- Emergency Evacuation Module.
- Detailed and customized reporting with multiple export options like PDF, Word, Excel, Image etc.
- □ Applicable to offices, salons, schools, co-working, hotels, events, societies and hospitals.

Integrations

Integrated with Emirates ID card.

Integrated with Passport Reader.

Integration with Access Control / Gate Barriers

Integration with Facial Recognition System

Integrated with Bluetooth App

Integrated with Web Camera

Integrated with QR Code Scanners

Automatic No plate Recognition Integration.

Facial Recognition Panel with Temperature Detection

Thermal Smart Facial Recognition Terminal

Key Advantages

High-Level Security

Finance-level dual lens liveness detection algorithm, which effectively protect attacks like videos, printed photos, portrait photo with hole, 3D mask, etc. Only encrypted feature values will save in front-end database in order to improves information security.

Easy to integration

Standard HTTP2 API, satisfy third party integration requirements.

Strong algorithm

Support 50 thousands local face database, front-end/back-end comparison time is less than 1 second, which guarantees the passing efficiency.

High Reliability

Support front-end and back-end comparison, and guarantee smooth operation even the network is disconnected.

Infrared temperature measurement t echnology

Adopt contactless high-infrared resolution technology, the accuracy of temperature screening can reach $\pm 0.5^{\circ}$ C under typical ambient temperature.

Android (Version 7.1 and Above)

8 inch multiple touch point screen, resolution 1280*800

2 megapixel RGB Camera + 2 megapixel infrared Camera

Recognition speed <0.5 second.

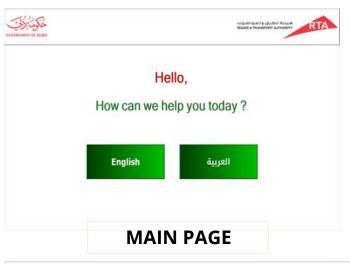

WiFiSupport. Power Supply DC12V/1.8A

KIOSK INTEGRATION

Kiosk with VMS Software
